

**APRIL 25, 2019 – RESPONSES TO INQUIRIES ON
RFQ RN 2019-04-15**

- 1) **Can you email me a copy of any specifications and/or documents associated with this project?**

There are no specifications, drawings or other documents currently available. The District is conducting its due diligence (Survey, Phase I ESA's, etc.) and the project architect is working on concept plans, demolition plans, and stabilization plans. All of those documents are in preliminary stages only, and are not expected to be available until May/June 2019.

- 2) **We believe that 12 pages [are] inadequate to answer all your questions thoroughly (or even briefly) and would like to request that the 12-page restriction be either lifted completely or expanded to 25 pages.**

The District will allow the page limit to be expanded to 20 pages.

- 3) **Would you consider an extension of the due date a few more days, perhaps to May 3 as a due date?**

Due to the nature of this project, the District will maintain the existing schedule.
