

Rio Nuevo Multipurpose Facilities District

Project: RFI RN-2021-08-02-TCC-Technology
RFQ RN-2021-08-02-TCC-NAMING
Date: August 25, 2021

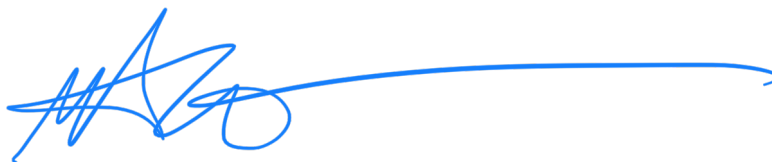

Subject: Submittal Clarification

As a point of clarification, this is a Request for Information (RFI) regarding how a vendor partner or group of vendor partners intends to partner with Rio Nuevo in supplying state of the art technology over a 5 to 10 year timeframe with Rio Nuevo.

Any references in the Q&A from potential vendor partners to "bids" or "bid packages" do not apply at this stage of the process. This RFI is not a "bidding" exercise where pricing and detailed design documents are required in answering this RFI. The intent of this RFI is to identify the areas a vendor partner can bring value to the Tucson Convention Center in their specific areas of expertise as outlined starting in pages 9-15 concerning the TCC's Telecommunications Infrastructure, Security Systems, and Audio-Visual Systems, including capital investment or financing offers.

Vendor partners are invited to creatively demonstrate how their hardware, software, and/or services, as an individual partner or group of partners, can provide the TCC the tools to be the most competitive convention center in the Country. Strategic creative partnering approaches are encouraged at this stage, as stated in the RFI, which may or may not include in examples as provided in the Scope section of the RFI on pages 7-9.

High level drawings are available upon request per the RFI. "Bids", "Bid Packages", or other teaming opportunities will occur in a subsequent Request for Proposal (RFP) after potential vendor partners have been down-selected based on their responses in this RFI.
